September 2026

Dear Parents and Carers,

At Hey with Zion, we are excited to be working towards becoming a more sustainable school, where we all play our part in caring for our environment and creating a healthier future for our children.

One of our first sustainability goals is to reduce the use of single use plastic water bottles in our school. We would love your support by encouraging your child to bring a named reusable water bottle with them each day.

Although a single plastic bottle may seem small, millions are thrown away every single day. Many end up in landfill or find their way into rivers and oceans, where they can harm wildlife and take hundreds of years to break down. Producing these bottles also uses valuable natural resources and creates greenhouse gases that contribute to climate change. By choosing a reusable water bottle, your family can help make a real difference.

Together we can:

- Reduce plastic waste and keep our environment cleaner.
- Protect wildlife and oceans from plastic pollution.
- Reduce carbon emissions linked to producing disposable plastics.
- Save money by refilling bottles instead of buying bottled water.
- Teach children positive lifelong habits that show how small actions can have a big impact.

We want our children to understand that everyone can help care for the planet. By making simple, everyday choices, they can become thoughtful, responsible people who value and protect the world around them.

Our school has fresh drinking water available throughout the day, so children can easily refill their reusable bottles whenever they need to.

Thank you for supporting us in our sustainability journey. By working together as a school community, we can inspire our children to make environmentally friendly choices and help create a greener future for everyone.

Thank you for your continued support.
